SPATIAL & TACTICAL DECONSTRUCTION

- Generated 2.14 Expected Goals against Legia Warszawa, outscoring model by +0.86.
- Luka Zahović registered highest individual shot quality with 0.58 xG on 6-yard strike.
- Lukas Podolski's long-range winner (0.09 xG) generated a Post-Shot xG (PSxG) of 0.88.
- Shot placement map proves clinical accuracy: both goals placed within 0.7m of posts.
- Central penalty area penetration accounted for 68.5% of total cumulative match xG.

HEAD COACH DIRECTIVE / MAC DIREKTIFI

Protect the cutback zone at 14-16m; deny Podolski clean sights on goal by stepping out rapidly

SPATIAL & TACTICAL DECONSTRUCTION

- Dual-variable encoding demonstrates high conversion under severe defensive duress.
- Zahović scores from 7.5m under 0.85 pressure index (2 defenders within 1.2m radius).
- Podolski screamer taken under low pressure (0.15), punishing Legia's passive edge-block.
- xG flow shows decisive momentum surges between 15-35' and 65-75'.
- Legia counter-attack at 58' contained before restoring late territorial composure.

EXECUTIVE SUMMARY & METHODOLOGY

Modern shot analysis requires dual encoding: the spatial origin of the strike and the defender pressure density at the instant of release. Górnik Zabrze created 2.14 cumulative Expected Goals against Legia Warszawa, overperforming by +0.86 due to world-class individual finishing from Lukas Podolski (0.09 xG screamer) and clinical penalty-box poaching from Luka Zahović (0.58 xG).

SPORTING DIRECTOR & COACHING ACTIONS

- High-Pressure Composure:** Converted 16.7% of shots taken under severe defender pressure (>0.70 density index).
- Golden Shooting Corridor:** Shots from the central 14-18m pocket accounted for 1.48 of the 2.14 total match xG.
- Game-State Momentum:** Decisive xG surges between minutes 15-35' and 65-75' cemented competitive dominance.

SÜPER LİG COMPETITIVE ADVANTAGE

Provides immediate tactical readiness and game-model alignment for Turkish Süper Lig title-contender and top-tier setups.
