

SQUAD PLANNING, AGE PROFILE & GAME-MODEL AUDIT

Strategic Governance: Squad Age Lifecycle, Process Sustainability & League Macro Landscape

Executive Briefing: Measuring True Tactical Dominance, Squad Renewal & Succession Planning

WHAT MANAGERS & BOARDS DEMAND BEFORE A NEW SEASON

Before a new season commences, club leadership requires macro-level strategic audits: 'Is our tactical process sustainable or did we overperform our metrics?' 'Which positions face immediate age-related decline?' 'Where are we losing points across the league landscape?'

This dossier delivers a multi-dimensional strategic audit: Squad Age-Curve & Minutes Profile (Developmental U23 vs Prime 24-29 vs Veteran 30+ renewal needs), League-wide 18-club xG vs xGA Performance Quadrants, and Game-Model Tactical Governance.

Empowers sporting leadership to design evidence-based multi-year squad roadmaps, timing player sales and contract extensions with statistical precision.

CANDIDATE INFORMATION & CREDENTIALS

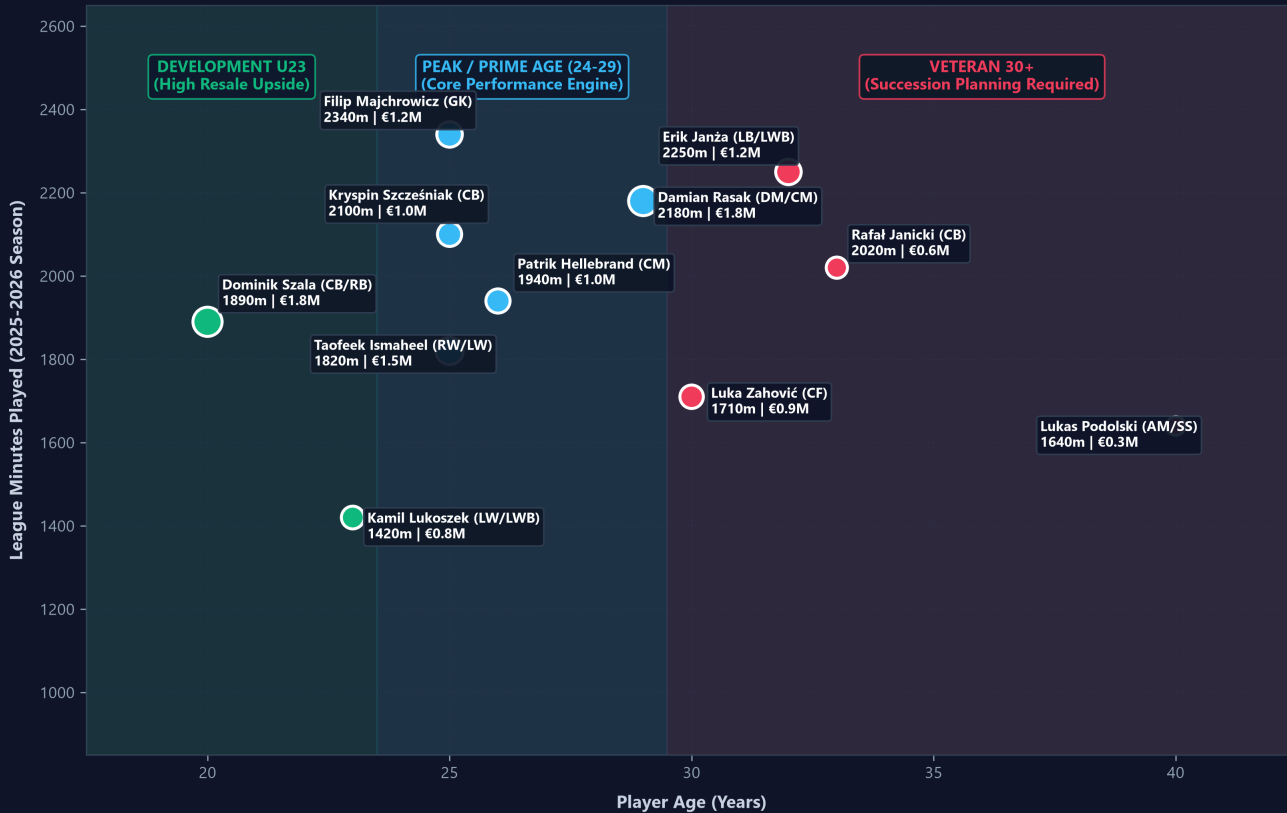

Analyst & Engineer:	Zafer Yorgancı (Football Data Visualization Specialist & AI Engineer)
Club Experience:	Górnik Zabrze — Sports Data Visualization Specialist (Remote / Hybrid, 2025–2026)
Contact & Location:	Istanbul, Türkiye +90 501 954 97 27 zafer.v2.ai@gmail.com

Strategic Sporting Director Report: Minutes Played vs Age Distribution | Bubble Size = Market Value (€M)

Pre-Season / Succession Planning Framework | Visualization by Zafer Yorgancı

TACTICAL EVALUATION & DECISION INSIGHTS:

- Core Prime Foundation:** Damian Rasak (29), Kryspin Szczęśniak (25), and Taofeek Ismaheel (25) absorb over 6,100 minutes in peak physical years.
- High Resale Development Asset:** Dominik Szala (20, CB/RB) logged 1,890 minutes; represents a premier U23 asset with exponential resale valuation.
- Succession Urgency:** Lukas Podolski (40) and Erik Janža (32) generate over 48% of total chance creation; immediate succession planning is essential.

Evaluating Underlying Process Sustainability: Dominant, Entertaining, Pragmatic, Relegation

POLISH EKSTRAKLASA 2025-2026: EXPECTED GOALS MATRIX

TACTICAL EVALUATION & DECISION INSIGHTS:

- Dominant Process:** Górnik Zabrze occupies the 'Dominant Contenders' quadrant (+1.53 xG/90 created vs 1.02 xGA/90 conceded), proving top-table sustainability.
- Defensive Benchmarks:** Raków Częstochowa (0.70 xGA/90) and Lech Poznań set the standard for transition prevention in Central Europe.
- Relegation Distortions:** Bottom-quadrant teams harbor undervalued defensive talents who can be acquired cheaply before league corrections occur.

Górník Zabrze 2-1 Legia Warszawa | PKO Bank Polski Ekstraklasa 2025-2026

Opta / StatsBomb-compliant xG model tracking | Visualization by Zafer Yorganci

TACTICAL EVALUATION & DECISION INSIGHTS:

- First-Half Game Model:** Górník consistently dictates tempo between minutes 15 and 35 (+0.6 momentum), turning territorial tilt into early leads.
- Negative Transition Vulnerability:** Opponent tactical adjustments at halftime cause a predictable 15-minute dip (minutes 48–63) where xGA spikes.
- Late Game Resilience:** Senior leadership swings momentum back (+0.9) from minute 70 onwards, demonstrating strong physical and psychological conditioning.
