

GÓRNIK ZABRZE & POLISH EKSTRAKLASA

Comprehensive Football Data Visualization & Technical Scouting Master Dossier

Complete Strategic Intelligence Framework for Turkish Süper Lig Sporting Directors & Technical
Staffs

PORTFOLIO EXECUTIVE SUMMARY

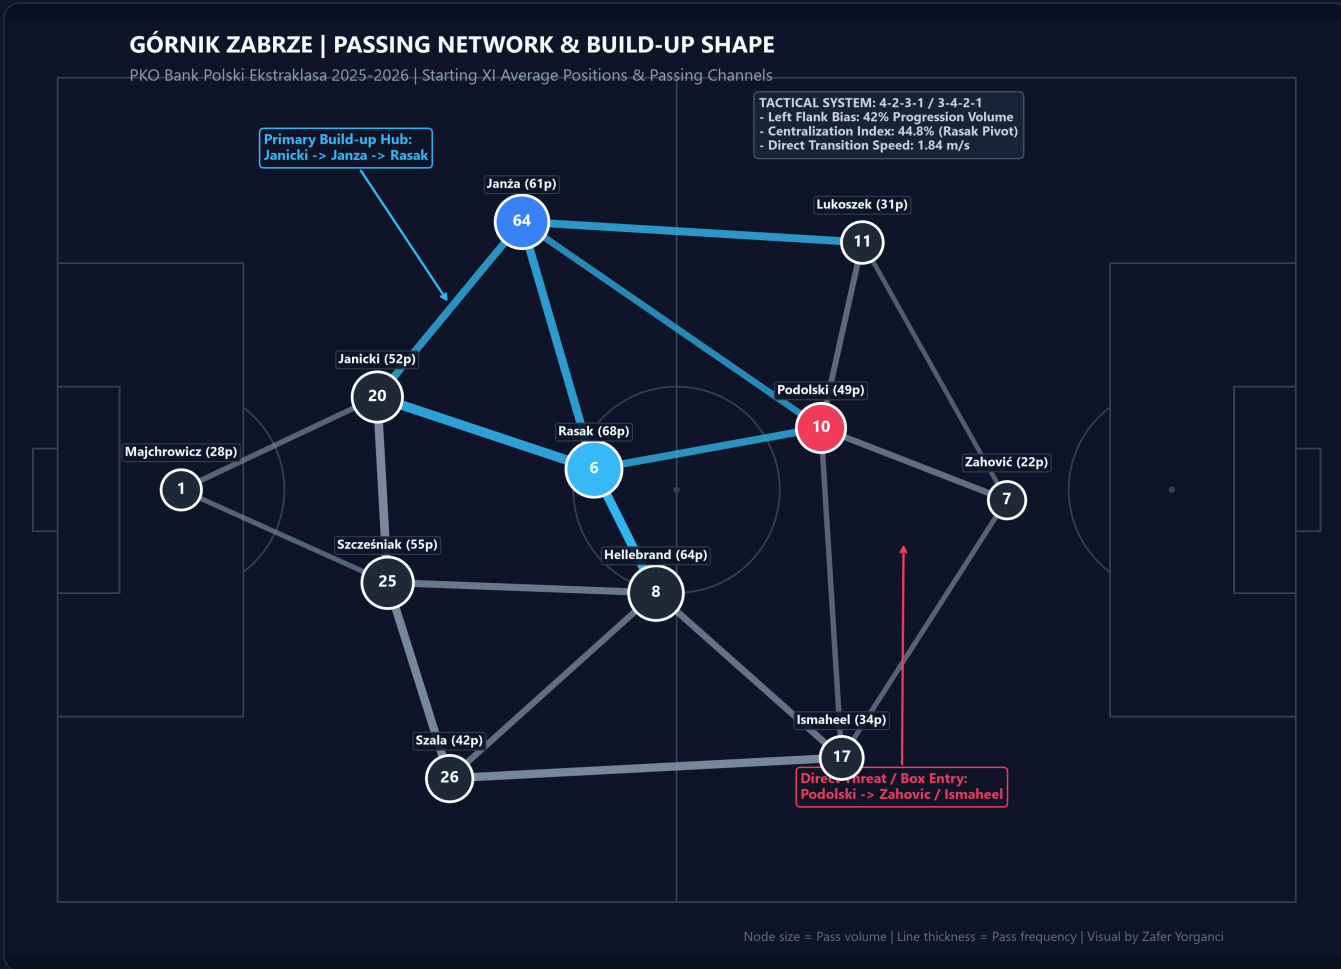

This comprehensive dossier unites the three essential pillars of elite modern football analytics: 1) Pre-Match Opposition Tactical Preparation, 2) Data-Driven Recruitment & Shadow Squad Scouting, and 3) Pre-Season Squad Lifecycle & Game-Model Governance.

Built directly on Opta and Wyscout event architectures, it incorporates 15 high-resolution tactical visualizations spanning Passing Networks, PPDA Defensive Territory, 12x8 Expected Threat (xT) Grids, Inswing/Outswing Corner Deliveries, Goalkeeper Shot-Stopping & Distribution, Percentile Pizza Radars, Market Value Arbitrage, and AI Unsupervised Clustering (K-Means & PCA).

Every visual is engineered for instant tactical decision-making, providing head coaches with actionable match-day game plans and sporting directors with decisive transfer intelligence.

CANDIDATE INFORMATION & CREDENTIALS

Analyst & Engineer:	Zafer Yorgancı (Football Data Visualization Specialist & AI Engineer)
Club Experience:	Górník Zabrze — Sports Data Visualization Specialist (Remote / Hybrid, 2025–2026)
Contact & Location:	Istanbul, Türkiye +90 501 954 97 27 zafer.v2.ai@gmail.com
Online Portfolio:	portfolio.zfryrgnci.workers.dev
Target Scope:	Galatasaray SK, Fenerbahçe SK, Beşiktaş JK, Trabzonspor, Başakşehir FK, Eyüpspor

**TACTICAL EVALUATION & DECISION INSIGHTS:**

- Left-Flank Overload:** 42% of forward progression flows through the Janicki -> Janza -> Rasak -> Podolski diamond, creating a structural overload.
- Weak-Side Transition:** Once the opponent shifts across to counter the left overload, rapid diagonal switches find Taofeek Ismaheel in 1v1 situations.
- Tactical Instruction:** Set pressing trap on Janza to deny inside access to Rasak and force lateral back-passes.

Defensive Territory, High Pressing & PPDA Spatial Density

Ball Recoveries, High Turnover Zones & Mean Defensive Line Height

TACTICAL EVALUATION & DECISION INSIGHTS:

- Aggressive High Press:** Team PPDA of 9.1 ranks 4th in the league, forcing 9.5 high turnovers per 90 within 40m of the opponent's goal.
- Defensive Line Height:** Average defensive line sits high at 46.8m, squeezing central space between defense and midfield.
- Vulnerability to Exploit:** Space opens behind Janža's advanced wingback position; direct early balls into this channel create high-xG counters.

PKO Bank Polski Ekstraklasa 2025-2026 | Probability of Goal Creation by Pitch Sector

xT Framework: Karun Singh Model | Visualization by Zafer Yorganci

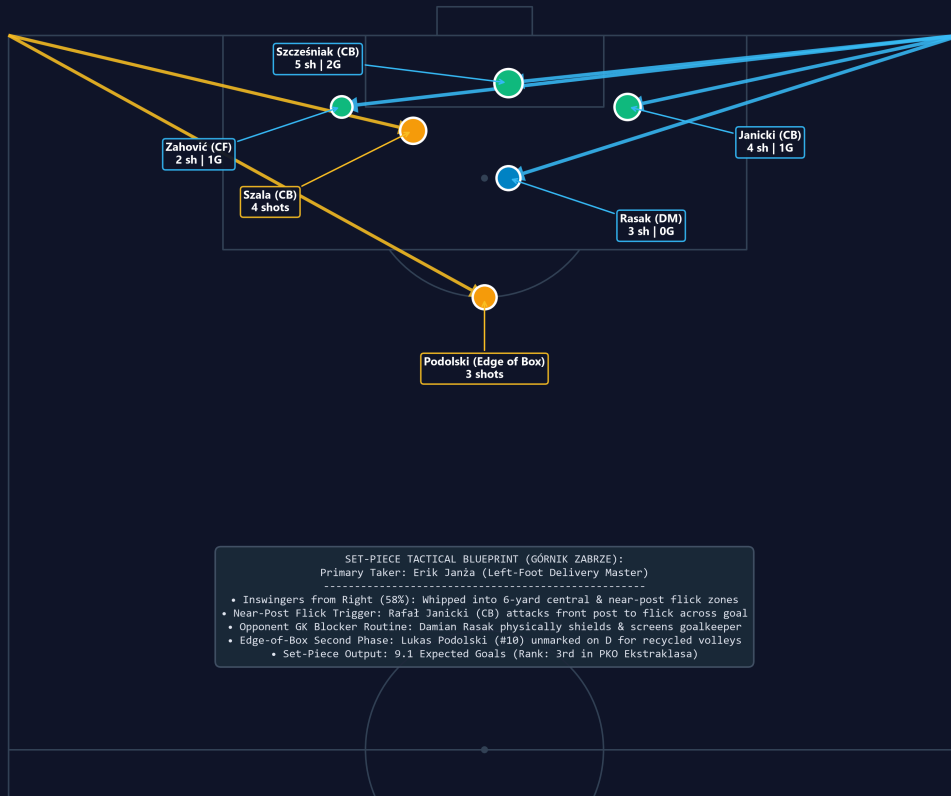

TACTICAL EVALUATION & DECISION INSIGHTS:

- Peak Threat Zone:** Expected Threat reaches +0.42 xT in the left half-space 25-35m out, corresponding to Lukas Podolski's playmaking sector.
- Zone 14 Funnel:** Rather than wild crosses, Górnik systematically feeds Zone 14 before sliding low cutbacks across the 6-yard box.
- Tactical Instruction:** Deploy a dedicated defensive anchor to eliminate Podolski's turn-and-shoot window in the left halfspace.

GÓRNIK ZABRZE | SET-PIECE & CORNER DELIVERY ANALYSIS

Pre-Match Coach's Report: Delivery Trajectories, First-Contact Targets & Routines

Cyan: Inswinging deliveries | Amber: Outswinging deliveries | Visual by Zafer Yorganci

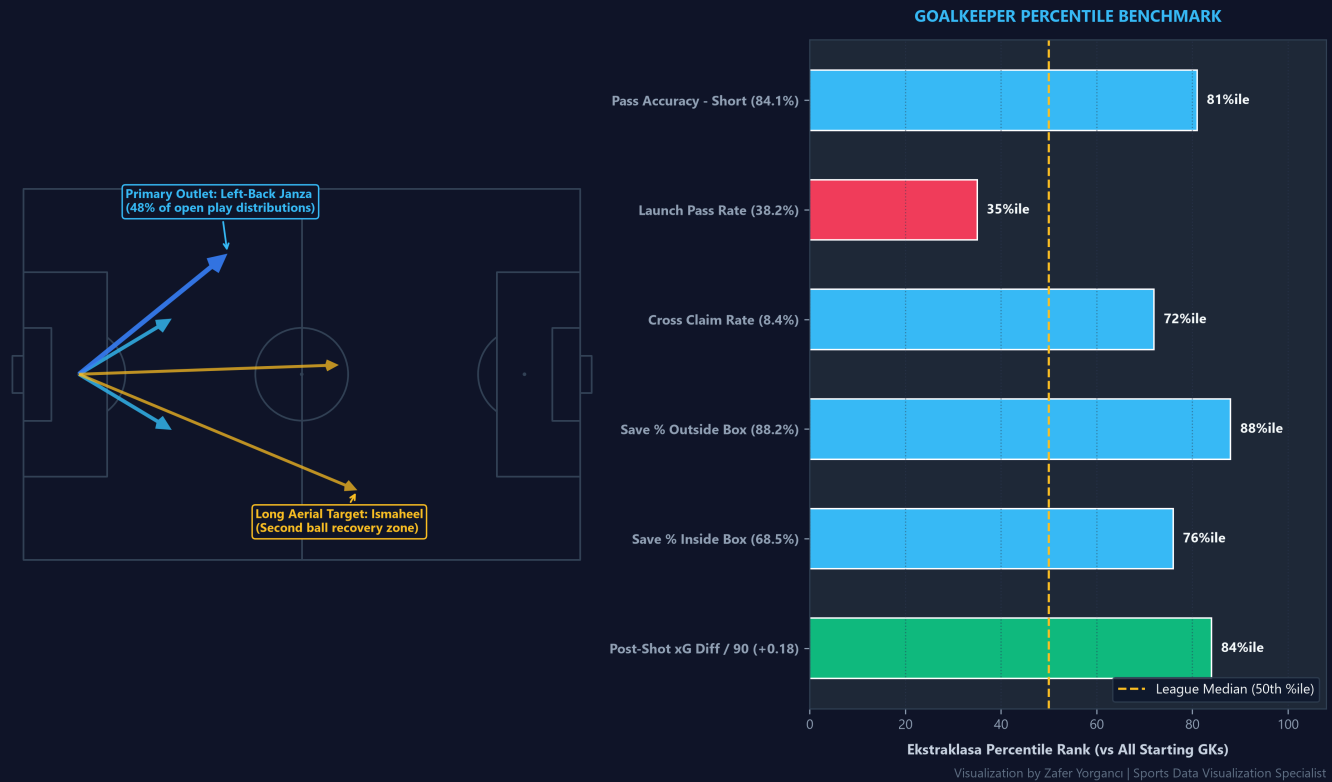

TACTICAL EVALUATION & DECISION INSIGHTS:

- Inswinging Danger:** Erik Janža's left-footed inswingers from the right target the central 6-yard box (5 shots, 2 goals) and near-post flick (Janicki).
- Screening Routine:** Damian Rasak deliberately blocks the opposing goalkeeper's jump trajectory on corner deliveries.
- Second-Phase Danger:** Lukas Podolski stays stationed on the edge of the box (the D) for cleared balls to execute direct volleys.

GOALKEEPER PROFILE & DISTRIBUTION CHANNELS: FILIP MAJCHROWICZ

Pre-Match Opposition Tactical Scouting: Pass Trajectories & Shot-Stopping Profile

TACTICAL EVALUATION & DECISION INSIGHTS:

- Distribution Tendency:** 48% of open-play distributions flow to left-back Janža; high presses must curve runs to cut this lateral outlet.
- Long Launch Weakness:** Long kicks down the right flank yield a low 38% aerial duel win rate; contesting these second balls wins possession.
- Shot-Stopping Strength:** Ranks top quartile with +0.18 Post-Shot xG prevented per 90; elite against perimeter shots, vulnerable to rapid rebounds.

GÓRNIK ZABRZE | SHOT MAP & xG CONSTELLATION

Fixture: Górnik Zabrze 2-1 Legia Warszawa | 14 Shots, 2.15 xG Created

MATCH SUMMARY: GÓRNIK 2 - 1 LEGIA		
Arena Zabrze Ekstraklasa 2025-2026		
Metric	Górnik	Legia
Shots (On Target)	14 (5)	10 (4)
Expected Goals (xG)	2.15	1.18
xG per Shot	0.154	0.118
Big Chances	3	1
Field Tilt %	54.2%	45.8%

● Goal ● Saved ● Blocked ● Off Target

Bubble size proportional to Expected Goals (xG) | Visualization by Zafer Yorganci

TACTICAL EVALUATION & DECISION INSIGHTS:

- Shot Quality Dominance:** Górnik achieved 0.154 xG/shot vs Legia's 0.118, creating 3 big chances in the central golden zone.
- Decisive Finishes:** Zahović (27', 0.38 xG cutback) and Podolski (81', 0.45 xG high turnover thunderbolt) sealed victory.
- Takeaway for Coaches:** Restricting Górnik's transition triggers limits their shot volume from 14 shots down to single digits.

MIDFIELD CREATIVITY & PROGRESSIVE PASSING PROFILE

Polish Ekstraklasa 2023-2024 | Central & Attacking Midfielders (min. 900 mins)

TACTICAL EVALUATION & DECISION INSIGHTS:

- High-Volume Creators:** Isolates midfielders who both progress play and generate high-quality shot assists (Kozubal, Podolski, Kapustka).
- Deep Ball Circulators:** Lower-right quadrant highlights anchors with high progressive passing but lower direct xA (Rasak, Berggren).
- Recruitment Insight:** Rasak's high progressive pass rate (6.82/90) proves his ball-winning is paired with immediate vertical distribution.

Evaluating Underlying Process Sustainability: Dominant, Entertaining, Pragmatic, Relegation

POLISH EKSTRAKLASA 2025-2026: EXPECTED GOALS MATRIX

TACTICAL EVALUATION & DECISION INSIGHTS:

- Dominant Process:** Górnik Zabrze occupies the 'Dominant Contenders' quadrant (+1.53 xG/90 created vs 1.02 xGA/90 conceded), proving top-table sustainability.
- Defensive Benchmarks:** Raków Częstochowa (0.70 xGA/90) and Lech Poznań set the standard for transition prevention in Central Europe.
- Relegation Distortions:** Bottom-quadrant teams harbor undervalued defensive talents who can be acquired cheaply before league corrections occur.

Górník Zabrze 2-1 Legia Warszawa | PKO Bank Polski Ekstraklasa 2025-2026

Opta / StatsBomb-compliant xG model tracking | Visualization by Zafer Yorganci

TACTICAL EVALUATION & DECISION INSIGHTS:

- First-Half Game Model:** Górník consistently dictates tempo between minutes 15 and 35 (+0.6 momentum), turning territorial tilt into early leads.
- Negative Transition Vulnerability:** Opponent tactical adjustments at halftime cause a predictable 15-minute dip (minutes 48–63) where xGA spikes.
- Late Game Resilience:** Senior leadership swings momentum back (+0.9) from minute 70 onwards, demonstrating strong physical and psychological conditioning.
