The diagram illustrates a network of 11 nodes, each represented by a blue circle with a white number. The nodes are labeled with names: 1: Szromnik, 2: Janicka, 3: Janicki, 4: Josema, 5: Szala, 6: Rasak, 7: Zahović, 8: Hellebrand, 9: Podolski, 10: Lukoszek, 11: Ismaheel. The nodes are interconnected by lines, with some connections highlighted in red. The connections are as follows: 1 is isolated. 2 is connected to 3, 4, and 5. 3 is connected to 2, 4, and 6. 4 is connected to 2, 3, and 5. 5 is connected to 2, 4, and 6. 6 is connected to 3, 4, 5, 7, 8, and 9. 7 is connected to 6 and 10. 8 is connected to 6 and 9. 9 is connected to 6, 8, and 10. 10 is connected to 7 and 9. 11 is connected to 6 and 9. The red lines highlight the connections between 2-3, 3-4, 4-5, 5-6, 6-7, 6-8, 6-9, 7-10, 8-9, 9-10, and 11-9.

SPATIAL & TACTICAL DECONSTRUCTION

- Left half-space generates the highest Expected Threat (+0.42 xT), driven by Podolski.
- Left flank represents the highest volume corridor with 94 completed vertical passes.
- Erik Janža successfully executes 8 cross-field switches to isolate Taofeek Ismaheel.
- Central spine penetration remains measured (52 passes) to mitigate turnover counter-attacks.
- Opposition low blocks are stretched horizontally via rapid 2-touch flank relocations.

HEAD COACH DIRECTIVE / MAÇ DIREKTİFİ

Force Górnik into their right flank by shading central coverage towards Janža and Podolski, targeting their lower volume right-side progression.

Passing Topology & Distribution Channel Summary

Pillar 2: Passing Networks & Structure • Key Takeaways & Recommendations

EXECUTIVE SUMMARY & METHODOLOGY

Passing network topology provides a direct visual readout of a team's tactical connectivity and tactical centroid. Damian Rasak functions as the undisputed distribution engine of Górnik Zabrze, registering 82 passes and linking the defensive backline to attacking half-spaces. The team maintains an expansive 1,220 m² outfield convex footprint, allowing rapid horizontal ball circulation to manipulate opposition pressing traps.

SPORTING DIRECTOR & COACHING ACTIONS

Centrality Reliance: High dependency on Damian Rasak: opposition man-marking schemes must be countered with third-man drop-ins.

Flank Channel Overload: 94 progressive passes executed through the left flank, creating high-percentage diagonal delivery channels.

Cross-Field Switches: Janža-to-Ismahheel switches (8 completions) present high-threat isolation against retreating low blocks.
