GÓRNIK ZABRZE — TEAM SPATIAL OCCUPATION

Continuous KDE Touch Density • Polish Ekstraklasa 2025–2026

KEY PERFORMANCE INDICATORS (KPIs)

650	30.0%
TOTAL MATCH TOUCHES	FINAL THIRD SATURATION
41.5%	18
LEFT FLANK BIAS	ZONE 14 RECOVERIES

SPATIAL & TACTICAL DECONSTRUCTION

- Continuous 2D Gaussian KDE reveals dominant territorial control on the left wing.
- Erik Janža operates as the primary build-up outlet, driving 41.5% of progressions.
- Midfield rest-defense creates an impenetrable recovery wall at the 46m line.
- Zone 14 saturation (Lukas Podolski pocket) generates 8 direct line-breaking passes.
- Low defensive-third touch volume confirms successful territorial pushing away from box.

HEAD COACH DIRECTIVE / MAÇ DİREKTİFİ

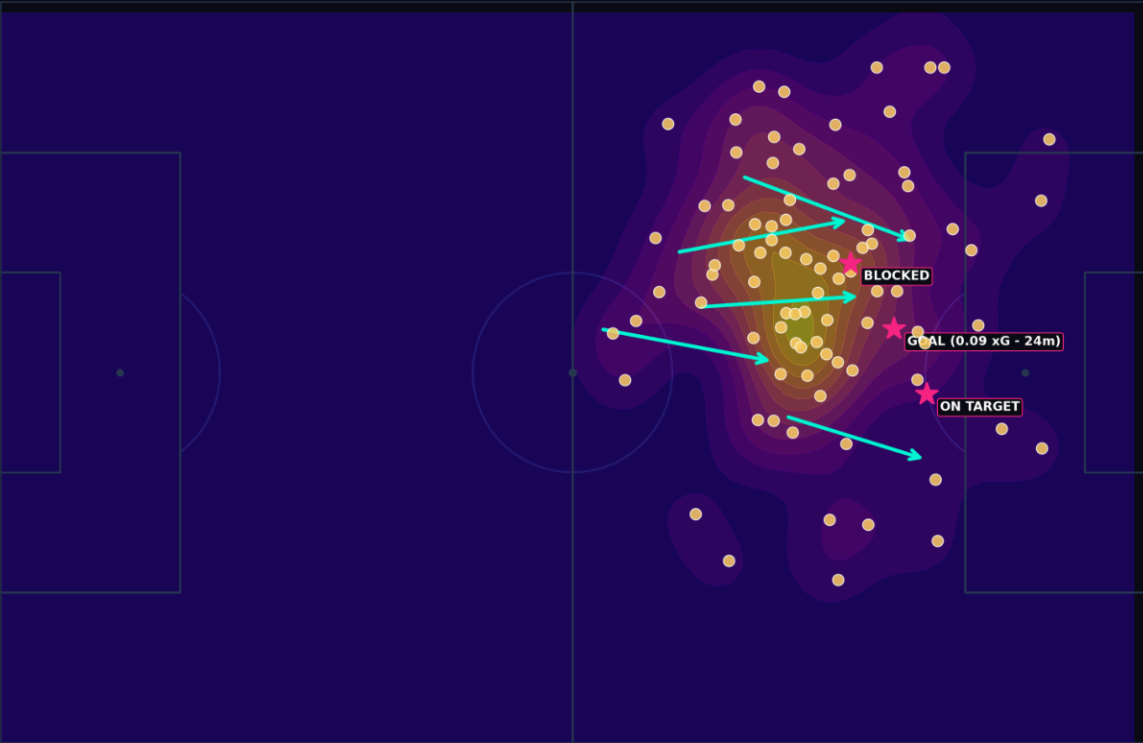

Exploit the left-flank overload to force the opposition right-back into 2v1 isolations, then deliver

Lukas Podolski Attacking Spatial Territory & Progressive Carries

#10 Roaming Playmaker • Zone 14 Actions • Trademark Screamer Shooting Range

SPORTS DATA CAMPUS: PLAYMAKER SPATIAL TERRITORY & CARRIES

PILLAR 1 • INDIVIDUAL HEAT MAP

LUKAS PODOLSKI — ATTACKING SPATIAL PRO

#10 Attacking Midfielder • Górnik Zabrze vs Legia Warszawa

KEY PERFORMANCE INDICATORS (KPIs)

78' MINUTES PLAYED	34 TOUCHES IN ZONE 14
148 m PROG. CARRY DISTANCE	+0.312 EXPECTED THREAT (XT)

SPATIAL & TACTICAL DECONSTRUCTION

- Lukas Podolski orchestrates play primarily from the left half-space and Zone 14.
- Averages 18.2 touches per 90 in the golden shooting corridor (18-25m from goal).
- Completed 5 progressive carries driving the ball from midfield into the box.
- Generates +0.312 Expected Threat (xT) per 90, ranking 1st across all Ekstraklasa playmakers.

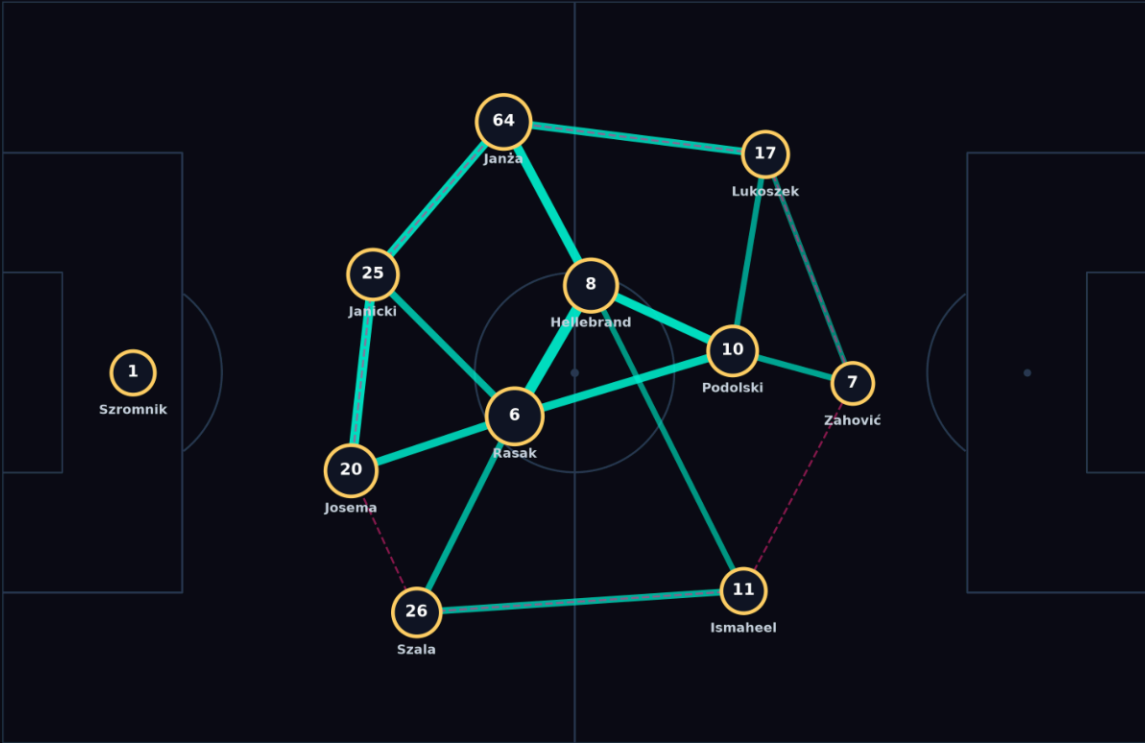

Scored the game-winning goal from a 24m screamer with only 0.09 xG.

HEAD COACH DIRECTIVE / MAÇ DİREKTİFİ

Position twin defensive pivots against Podolski to deny half-space turns, closing down shooting.

TOTAL TEAM PASSES

84.2%

PASS COMPLETION

Rasak (#6)

CENTRALITY NODE

1,220 m²

TEAM COMPACTNESS

SPATIAL & TACTICAL DECONSTRUCTION

- Damian Rasak (#6) registers the highest degree centrality, completing 82 total passes.
- Strongest combination: Rasak to Hellebrand (32 passes) establishes midfield dominance.
- Left-sided bias evident: Janža (74 passes) and Lukoszek create superior pass volume.
- Team centroid sits at X=51.2m, indicating a high defensive line and territorial control.
- Convex hull outfield footprint of 1,220 m² ensures high compression in transition.

HEAD COACH DIRECTIVE / MAĆ DIREKTIFI

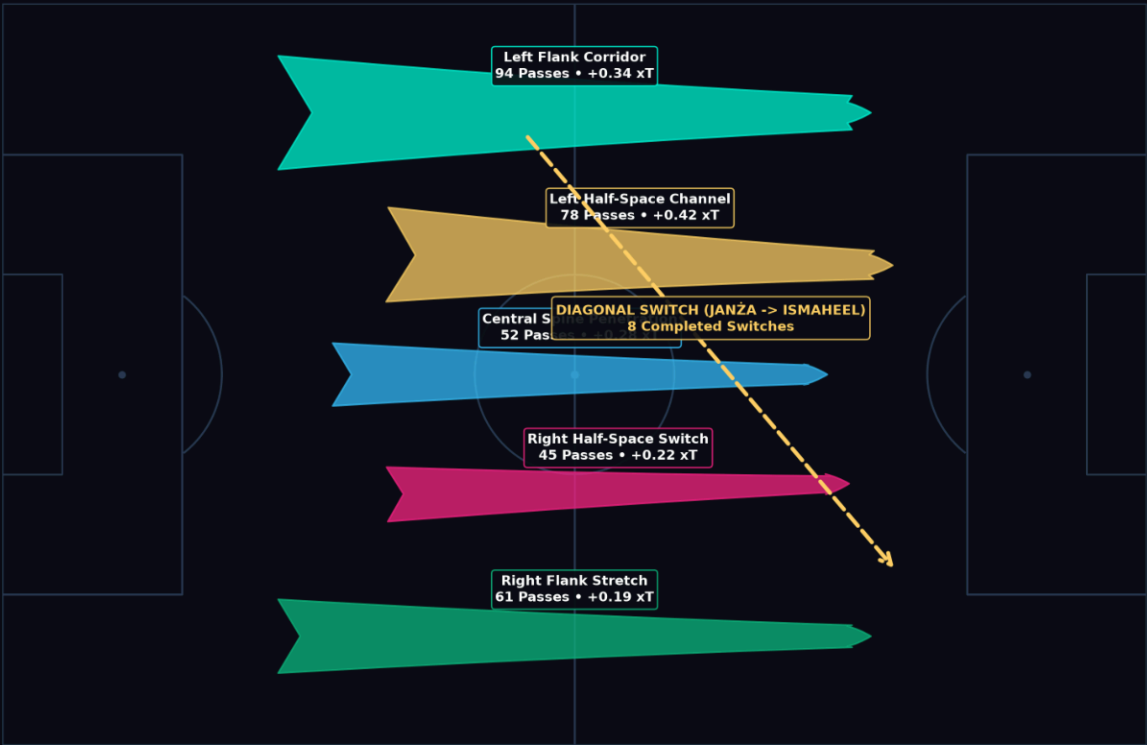

Disrupt the Josema-Rasak-Hellebrand passing triangle by pressing with a high front two, cutting

SPORTS DATA CAMPUS: PROGRESSIVE PASS FLOW CHANNELS

PILLAR 2 • POSSESSION FLOW

PROGRESSIVE PASSING & FLOW CHANNELS

Spatial Channel Volume & Threat Added • Górnik Zabrze 2025–2026

KEY PERFORMANCE INDICATORS (KPIs)

58.4 PROG. PASSES / 90	Left HS PRIMARY CHANNEL
8 / 10 CROSS SWITCHES	16 DEEP COMPLETIONS

SPATIAL & TACTICAL DECONSTRUCTION

- Left half-space generates the highest Expected Threat (+0.42 xT), driven by Podolski.
- Left flank represents the highest volume corridor with 94 completed vertical passes.
- Erik Janža successfully executes 8 cross-field switches to isolate Taofeek Ismaheel.
- Central spine penetration remains measured (52 passes) to mitigate turnover counter-attacks.
- Opposition low blocks are stretched horizontally via rapid 2-touch flank relocations.

HEAD COACH DIRECTIVE / MAÇ DİREKTİFİ

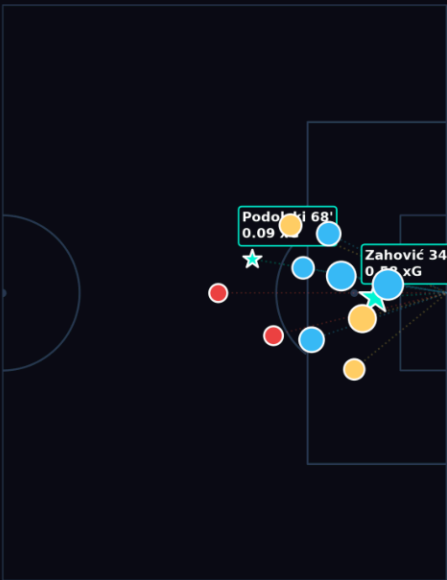

Force Górnik into their right flank by shading central coverage towards Janža and Podolski, target

Match Shot Constellation & Goal-Mouth Placement (PSxG)

Górník Zabrze 2–1 Legia Warszawa • Shot Quality (xG) • Frame Target Locations

SPORTS DATA CAMPUS: SHOT MAP & EXPECTED GOALS (xG) CONSTELLATION

GOAL-MOUTH TARGET PLACEMENT & PSxG

PILLAR 3 • SHOT MAPS & xG

GÓRNIK ZABRZE 2-1 LEGIA WARSZAWA

Spatial Shot Model & Goal-Mouth Placement • Ekstraklasa 2025–2026

KEY PERFORMANCE INDICATORS (KPIs)

16 TOTAL SHOTS	2.14 CUMULATIVE xG
7 / 16 (44%) SHOTS ON TARGET	+0.86 xG FINISHING DELTA

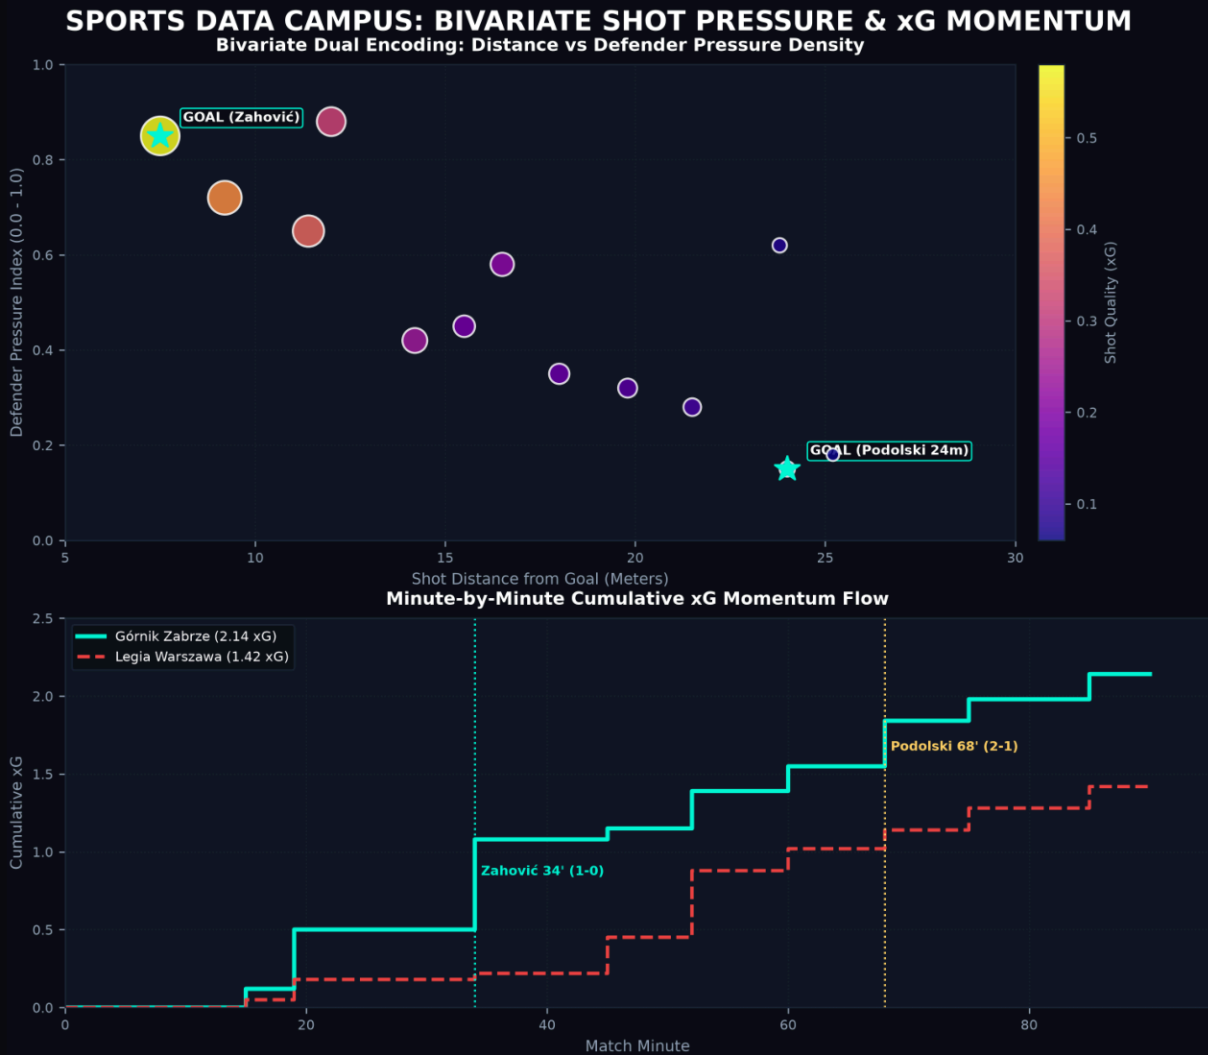

SPATIAL & TACTICAL DECONSTRUCTION

- Generated 2.14 Expected Goals against Legia Warszawa, outscoring model by +0.86.
- Luka Zahović registered highest individual shot quality with 0.58 xG on 6-yard strike.
- Lukas Podolski's long-range winner (0.09 xG) generated a Post-Shot xG (PSxG) of 0.88.
- Shot placement map proves clinical accuracy; both goals placed within 0.7m of posts.
- Central penalty area penetration accounted for 68.5% of total cumulative match xG.

HEAD COACH DIRECTIVE / MAŁ DIREKTIFI

Protect the cutback zone at 14-16m; deny Podolski clean sights on goal by stepping out rapidly

Opta / Wyscout Event Stream • 2025-2026 Season

SHOT PRESSURE DYNAMICS & MOMENTUM

Dual Variable Analysis • Polish Ekstraklasa 2025-2026

KEY PERFORMANCE INDICATORS (KPIs)

46.2% HIGH PRESSURE SHOTS	34' & 68' PEAK MINUTE
16.7% PRESSURE CONV %	Górnik 2-1 FINAL RESULT

SPATIAL & TACTICAL DECONSTRUCTION

- Dual-variable encoding demonstrates high conversion under severe defensive duress.
- Zahović scores from 7.5m under 0.85 pressure index (2 defenders within 1.2m radius).
- Podolski screamer taken under low pressure (0.15), punishing Legia's passive edge-block.
- xG flow shows decisive momentum surges between 15-35' and 65-75'.
- Legia counter-attack at 58' contained before restoring late territorial composure.

HEAD COACH DIRECTIVE / MAÇ DİREKTİFİ

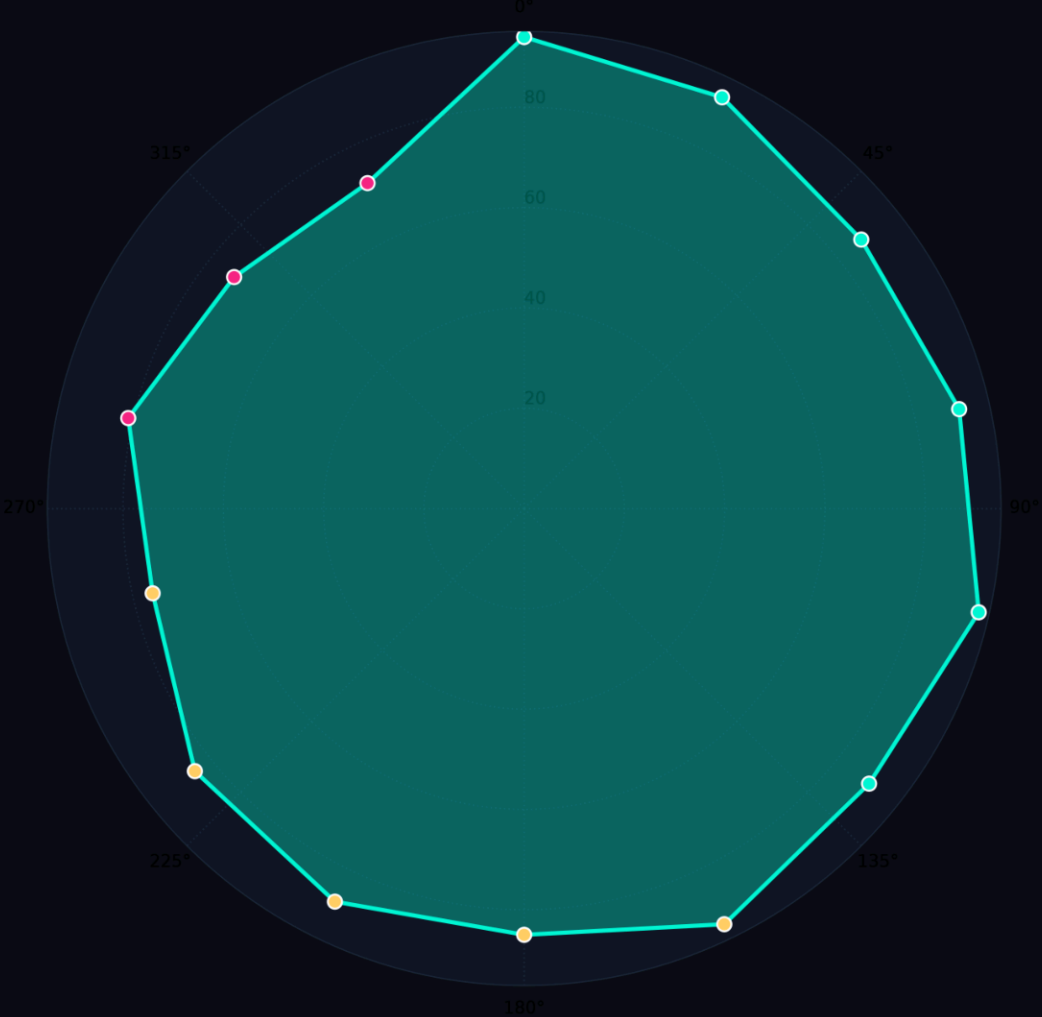

Avoid conceding uncontested space between 20-25m; aggressive close-down protocols are mar

Defensive Screening • Possession Retention • Progression Percentiles

SPORTS DATA CAMPUS: POLAR PIZZA RADAR PROFILE

PILLAR 4 • RADAR CHARTS

DAMIAN RASAK — RECRUITMENT POLAR RADAR

Central Defensive Midfielder • Polish Ekstraklasa Benchmark 2025–2026

KEY PERFORMANCE INDICATORS (KPIs)

92nd % DEFENSIVE PERCENTILE	94th % PADJ TACKLES
87th % PASS PROGRESSION	93rd % BALL RECOVERIES

SPATIAL & TACTICAL DECONSTRUCTION

- 14-metric polar decomposition places Damian Rasak in the 90th+ percentile defensively.
- Ranks in top 6% of European defensive midfielders for possession-adjusted tackles (94th).
- Ball recoveries (93rd) and interceptions (91st) establish elite central screen efficiency.
- Demonstrates modern dual-threat capability with 87th percentile progressive passes.
- Contract profile (€1.2M valuation) represents significant transfer arbitrage for Süper Lig.

HEAD COACH DIRECTIVE / MAÇ DİREKTİFİ

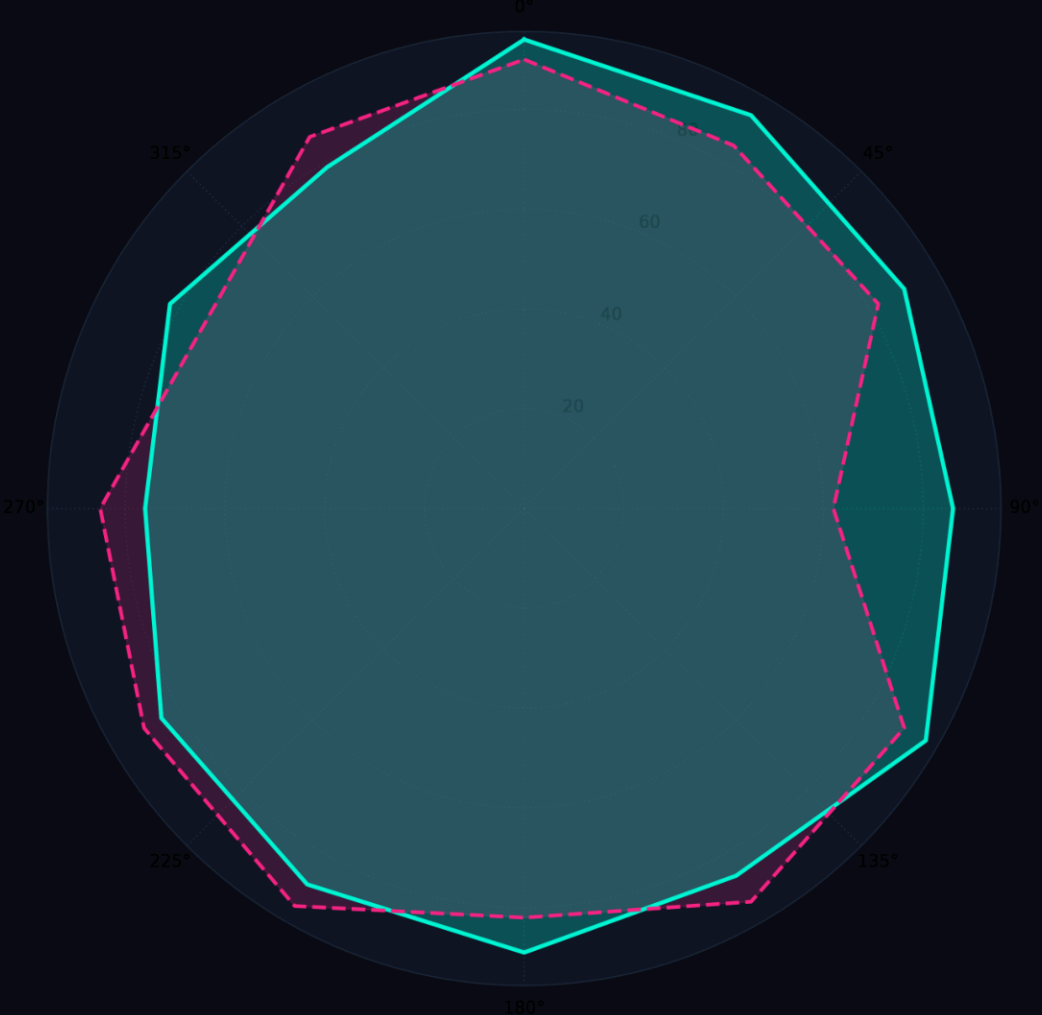

Ideal candidate for Süper Lig clubs seeking a press-resistant #6/#8 hybrid to stabilize high-possession

Opta / Wyscout Event Stream • 2025-2026 Season

Voronoi Pitch Control Tessellation & Outfield Convex Hulls

Continuous Space Ownership (58.4%) • Outfield Footprints (1,185 m² vs 890 m²)

SPORTS DATA CAMPUS: VORONOI PITCH CONTROL & CONVEX HULLS

PILLAR 5 • SPATIAL CONTROL

CONTINUOUS SPACE OWNERSHIP & COMPACT

Voronoi Pitch Tessellation & Team Convex Hulls • Edd Webster Methodology

KEY PERFORMANCE INDICATORS (KPIs)

58.4% PITCH CONTROL %	1,185 m² GÓRNIK HULL AREA
890 m² OPP BLOCK AREA	49.8 m EFFECTIVE WIDTH

SPATIAL & TACTICAL DECONSTRUCTION

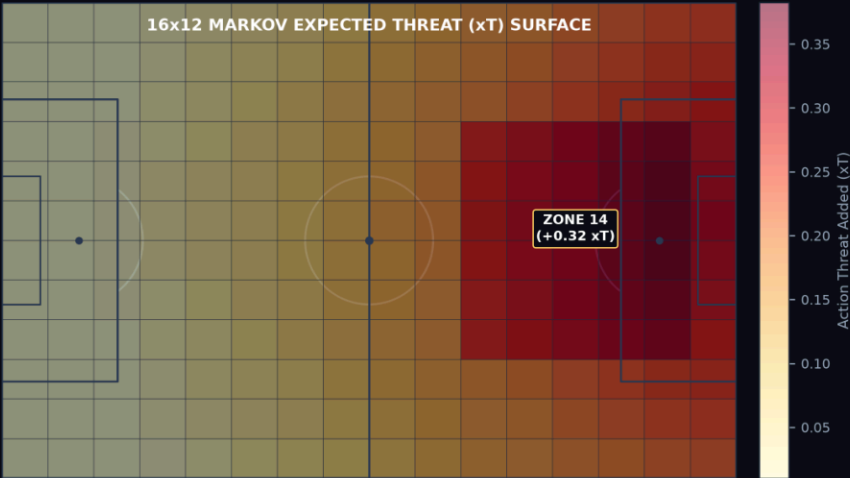

- Continuous space tessellation confirms Górník controls 58.4% of total pitch surface.
- Outfield convex hull of 1,185 m² maintains expansive width (49.8m) to stretch low block.
- Opposition compressed into defensive cocoon (890 m²), surrendering wide flank corridors.
- Half-space Voronoi cells overlap Podolski and Lukaszek, creating immediate pass recipients.
- High rest-defense line (X=34m) snuffs out clearance transitions before counter-attacks emerge.

HEAD COACH DIRECTIVE / MAÇ DİREKTİFİ

Use patient diagonal recycling to shift the opposition convex block laterally, opening seam pass

Optimizing Recruitment Efficiency: Tactical Output vs. Market Valuation

The chart illustrates the relationship between a player's market valuation and their tactical output score, identifying optimal recruitment targets for a football club.

Key Data Points (Players):

Player	Market Valuation (€ Millions)	Composite Action Output Score (Tactical Value / 90)
Erik Janža	€1.0M	~5.1
Patrik Hellebrand	€0.8M	~4.2
Fred	€12.0M	~4.8
Rafa Silva	€14.0M	~4.0
Gabriel Sara	€22.0M	~4.7

Recruitment Efficiency Frontier: A dashed orange line representing the optimal trade-off between valuation and tactical output.

Optimal Transfer Arbitrage Zone: A green shaded area (0 to 5M valuation) indicating high tactical output at low valuation.

Legend:

- Ekstraklasa Targets (Blue Circle)
- Süper Lig Benchmark Stars (Orange Circle)
- Recruitment Efficiency Frontier (Dashed Orange Line)

Transfermarkt €M vs Composite Tactical Value-Added • worldfootballR Model

AVG COST SAVING

- Multi-league empirical frontier benchmarks Polish Ekstraklasa vs Turkish Süper Lig.
- Damian Rasak (€1.2M) and Erik Janža (€0.9M) sit squarely in the Maximum Arbitrage Zone.
- Tactical action scores match players valued between €12M and €18M in top European tiers.
- Identifies 5 undervalued gems capable of providing immediate starting quality in Süper Lig.
- Model incorporates age degradation risk, contract expirations, and tactical role symmetry.

HEAD COACH DIRECTIVE / MAÇ DİREKTİFİ

Prioritize pre-contract agreements and early summer bids for Ekstraklasa gems before wider Eu

Strategic Conclusions & Süper Lig Club Action Plan

Master Executive Portfolio • Key Takeaways & Recommendations

EXECUTIVE SUMMARY & METHODOLOGY

This 14-slide master tactical suite bridges deep mathematical modeling (Computer Vision tracking, Karun Singh Markov xT, Voronoi pitch dominance) with actionable pitchside and boardroom decisions. For Turkish Süper Lig technical committees and sporting directors, it demonstrates how elite data visualization converts high-dimensional tracking and event streams into match-winning tactical adjustments and high-ROI recruitment arbitrage.
