

ZAFER YORGANCI

FOOTBALL DATA VISUALIZATION SPECIALIST & AI ENGINEER

📍 Istanbul, Türkiye (Poland Background) 📧 yorgancizafer1@gmail.com 🌐 portfolio.zfryrgnci.workers.dev

👤 github.com/zfryrgnci

🎯 TARGET: First Team Football Data Visualization Specialist / Technical Tactical Analyst (Süper Lig Scope)

EXECUTIVE PROFILE

Specialized **Football Data Visualization Specialist and AI Engineer** synthesizing broadcast computer vision tracking, spatial pitch control models, and multi-provider match event feeds (StatsBomb, Opta, Wyscout, Transfermarkt) into decisive tactical intelligence. Proven club experience delivering pre-match opposition tactical dossiers, real-time spatial deconstructions, and recruitment arbitrage models for **Górnik Zabrze** (Polish Ekstraklasa 2025–2026). Bilingual background (Polish educated/resident background, native Turkish speaker in Istanbul); uniquely equipped to empower Turkish Süper Lig technical staffs (Galatasaray, Fenerbahçe, Beşiktaş, Trabzonspor).

PROFESSIONAL FOOTBALL EXPERIENCE

Sport Data Visualization Specialist & Performance Consultant | Górnik Zabrze SSA (Ekstraklasa, 2025 – 2026 Season (Remote) Poland)

- **Pre-Match Tactical Intelligence:** Engineered automated opposition dossiers analyzing defensive line depth, pressing triggers (PPDA), goalkeeper build-up distribution, and corner delivery cluster routines for the coaching staff.
- **Spatial Pitch Control & Convex Hulls:** Modeled continuous Voronoi space dominance (Górnik 58.4% mean control) and outfield team convex hulls calculating compactness area (m²), effective width (m), and depth (m).
- **Midfield Passing Sonars:** Built 360° polar pass sonar engines for midfield engines (Damian Rasak, Patrik Hellebrand, Erik Janža) breaking down pass directionality, progressive length, and press-resistance under pressure.
- **Markov Expected Threat (xT):** Calibrated 16x12 Karun Singh transition matrices isolating Zone 14 penetrations (Podolski +0.288 xT/90) and flank crossing overloads (Janža +0.312 xT/90).
- **Recruitment Arbitrage Pipelines:** Integrated worldfootballR and Transfermarkt APIs to construct multi-league valuation frontiers, uncovering high-impact undervalued targets (€1M–€1.5M) for Turkish Süper Lig transfer windows.

BENCHMARK TECHNICAL ARCHITECTURE

1. Computer Vision & 2D Radars (roboflow/sports):

Fine-tuned YOLOv11x + ByteTrack optical tracking with Direct Linear Transform (DLT) Homography projecting broadcast video to 2D metric pitch coordinates (0.142m RMSE) with velocity vectors.

2. Spatial Analytics (eddwesbster/football_analytics):

Voronoi territorial partitioning, team tactical shape convex hulls, and passing network graph centrality models.

3. Tactical Aesthetics & xT (0xjuanma/golazo):

Publication-grade dark UI styling, bivariate shot quality maps with defender pressure density, and Markov xT flow vectors.

4. Multi-League Pipelines (worldfootballR):

Automated scrapers for FBref, Transfermarkt, and Understat evaluating player performance vs market valuation frontiers.

KEY TACTICAL IMPACT & SÜPER LIG READINESS

Tactical Impact at Górnik Zabrze:

- **Match Preparation Turnaround:** Automated opposition data ingestion pipeline, reducing coach briefing preparation from 48h to 4h.
- **Set-Piece Defensive Optimization:** Inswinging corner marking cluster models boosted first-contact duel win rate by +22%.

Turkish Süper Lig Operational Fit:

- **High-Press & Transition Analysis:** Proven algorithms isolating opposition escape outlets against intense pressing (Galatasaray, Fenerbahçe, Beşiktaş).
- **Bilingual Matchday Presence:** Native Turkish speaker based in Istanbul; ready for immediate on-site matchday and training ground deployment.

TECHNICAL COMPETENCIES & EDUCATION

TRACKING & COMPUTER VISION

Python, PyTorch, YOLOv11x, ByteTrack, OpenCV, Planar Homography (DLT), TensorRT

EVENT PROVIDERS & MODELS

StatsBomb, Opta, Wyscout, worldfootballR, Karun Singh xT, Bivariate xG, k-Means

SPATIAL & TACTICAL ANALYTICS

mplsoccer, SciPy (Voronoi/ConvexHull), NumPy, Pandas, Matplotlib, Seaborn

REPORTING & LANGUAGES

Headless Playwright PDF Engine, Turkish (Native), Polish (Fluent/Educated), English (Fluent)
